SUTURES & LIGATURES

A Division of
PT EFADA Medical Industries Indonesia

WWW.SUTCON.NET

Sutcon Sutures memulai bisnisnya melalui kerjasama antara Jerman dan Inggris di Yordania dan Indonesia. Perusahaan ini utamanya bergerak dalam bidang manufaktur jarum dan benang jahit bedah steril yang mudah diserap dan yang tidak dapat diserap menggunakan standar USP & EP dengan jangkauan pemasaran yang luas.

Semua fasilitas kami jalankan dengan sistem jaminan mutu, berdasarkan prosedur tertulis, dalam kontrol proses yang lengkap dan perencanaan kualitas yang teliti. Bersama tim teknis dan partisipasi monitoring karyawan dalam pembuatan benang mulai dari bahan baku hingga menjadi produk jadi, kami menjamin produk kami dapat menjadi andalan dan kepuasan pelanggan. Di Sutcon, kami juga memiliki fasilitas tempat pengujian lengkap untuk melakukan seluruh insrtumental kimia dan mikrobiologis tes.

Produk Sutcon memenuhi persyaratan European Medical Device Directive 93/42EEC dan spesifikasi British Pharmacopoeia (B.P) European Pharmacopoeia (Ph, Eur) dan United States Pharmacopoeia (USP). Komitmen kami terhadap mutu bermula dari semua aktifitas kami dan diatur oleh Sistem Manajemen Mutu Internasional.

Sutcon Sutures commenced its business operations through a German and Uk collaboration in jordan and Indonesia. the Company is primarily engaged in the manufacturing and the marketing of a Comprehensive range of sterilized absorbable and nonabsrbable surgical sutures, as per USP & EP.

At our state of the art facility, we operate with a quality assurance system, based on written procedures, exhasutive inprocess controls and a meticulous quality plan. An ever attentive technical team along with employee participation monitors the manufacturing of sutures from raw materials to the finished product stage enabling us to guarantee product reliability and customer satisfaction. At Sutcon, also we have a full in house testing facility to conduct all Chemical instrumental and Microbiological tests

Sutcon products meet the requirements of the European Medical Device Directive 93/42 / EEC and the specifications of the British pharmacopoeia (B.P) European pharmacopoeia (Ph. Eur) and United States Pharmacopoeia (USP)

Our commitment to quality is deep rooted in all our activities and is governed by international Quality Management System

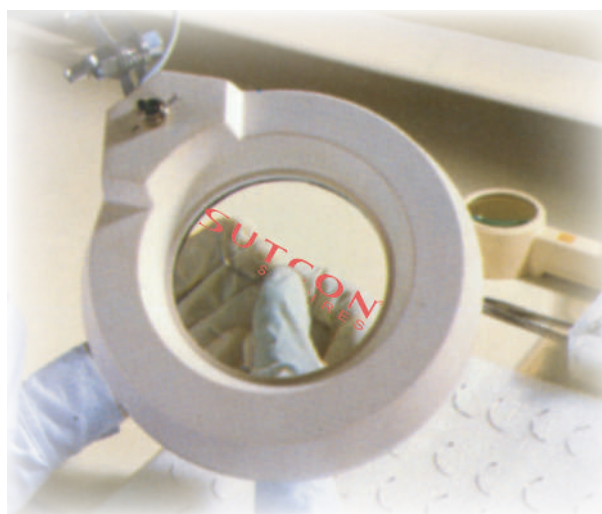

Quality Assurance

Laboratorium penjamin mutu kami menggunakan teknis pengawasan modern. Kontrol dan aturan yang ketat untuk spesifikasi kualitas kami pastikan untuk mejamin keunggulan produk kami. Bahan baku yang digunakan melewati prosedur pengujian yang ketat untuk menghasilkan produk jadi yang memenuhi standar USP.

Stabilitas jangka panjang dari setiap pembuatan produk selalu dipantau secara terus menerus dan pengawasan pemasaran dilakukan secara acak untuk menilai kinerja setelah pengiriman produk .

Our Quality Assurance Laboratory adopts modern analytical techniques. Rigorous control and strict adherence to quality specifications have enabled us to ensure guaranteed reliability of our products. The raw materials used in manufacturing go through strict testing procedures to produce the finished products in compliance with USP standards.

The long-term stability of each batch is monitored continuously and post marketing surveillance is conducted on random batches to assess the performance of the products after dispatch.

Absorbable Sutures

BRAND

DESCRIPTION

FREQUENT APPLICATIONS

SUTRYL 910

Sterile Braided Coated
Synthetic Absorbable
Polyglactin 910
Violet/Undyed Suture.

General Closure, Gastro - Intestinal,
Ob-Gyn, Orthopaedics where
eventual absorption of suture is
required. Undyed form is specially for
Cuticular and Plastic Surgeries.

SUTRYL

Sterile Braided Coated
Synthetic Absorbable
Polyglycolic Acid Violet /
Undyed Suture.

General Closure, Gastro-Intestinal,
Ob-Gyn, Orthopaedics where
eventual absorption of suture is
required. Undyed form is specially for
Cuticular and Plastic Surgeries.

SUTRYL quick

Sterile Braided Coated
Synthetic Absorbable
Polyglactin 910 Rapid
Undyed Suture.

General Closure, Gastro-Intestinal,
Ob-Gyn, Orthopaedics where
eventual absorption of suture is
required. Undyed form is specially for
Cuticular and Plastic Surgeries.

PDO II

Sterile Monofilament
Synthetic Absorbable
Polydioxanone Violet / Clear
Suture.

General Closure, Vascular Surgeries ,
Ob-Gyn, Orthopaedics where
eventual absorption of suture is
required. Undyed form is specially for
Cuticular and Plastic Surgeries.

SUPRON

Sterile Monofilament
Synthetic Absorbable
Poliglycapron PGCL
Violet / Clear Suture.

General Closure, Obstetrics &
Gynaecological Surgeries
Ophthalmology, Urology,
Orthopaedics, Bowel Anastomosis
Ligation.

CHROGUT

Sterile Catgut Chromic Suture

General Closure, Obstetrics &
Gynaecological Surgeries,
Ophthalmology, Urology,
Orthopaedics, Bowel Anastomosis
Ligation.

PLAINGUT

Sterile Catgut Plain Suture

General Closure, Obstetrics &
Gynaecological Surgeries
Ophthalmology, Urology,
Orthopaedics, Bowel Anastomosis
Ligation.

SILKPRO

Sterile Braided Non-Capillary
Silk Suture

General Closure, Cardiovascular,
Plastic Surgeries, Ophthalmology,
Urology, Orthopaedics, Bowel
anastomosis Ligation.

SULENE

Sterile Monofilament
Polypropylene Suture

General Closure, Vascular Prostheses,
Cardiovascular Orthopaedics,
Paediatrics, Ophthalmology, Plastic &
Micro Vascular Surgeries.

BIOLON

Sterile Monofilament
Polyamide Suture

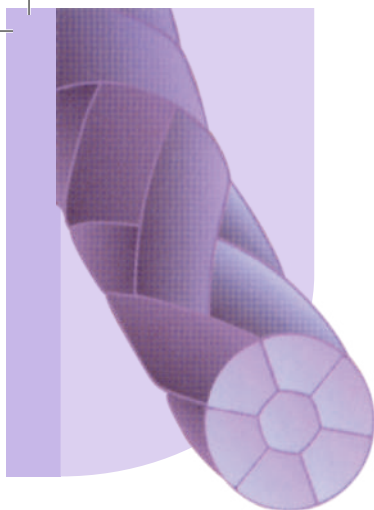

General Closure of Skin, Plastic
Surgery, Buried Subcutaneous,
Removable Subcuticular,
Ophthalmology and Microsurgery.

SUTCARE

Sterile Coated Braided
Polyester Suture

General Surgery, Plastic and Manual
Surgery, Skin Closure, Orthopaedics ,
Ophthalmic and Cardiovascular
Surgeries.

SUTRYL 910

Polyglactin 910, Synthetic Absorbable Surgical Sutures Coated & Braided

Composition

SUTRYL 910 is a well-known combination of 90% Polyglycolic Acid and 10% Lactic Acid.

Braided

For easy handling and secure knot tying.

Coated

SUTRYL 910 is coated with Poly [glycolide-co-L-lactide] and calcium stearate to ensure excellent handling and knot security.

Synthetic

Ensures smooth passage through tissues, for minimal tissue reaction.

Absorbable

Predictable absorption by simple hydrolytic mechanism.

Tensile Strength

SUTRYL 910 is very high initial tensile strength minimizing breakage during surgery. Retention of 85% at the end of first week, 67% at the end of second week and 45% at the end of the third week of implantation.

Color

Suture dyed with US F.D.A approved D&C Violet No.2 Color, for easy identification during surgical process. Also produced as Undyed.

Range

Gauge sizes 6/0 to 2 (U.S.P)

Supplied as needled sutures and ligatures.

Sterilisation

Ethylene Oxide

Needle Features

- Attached with needles made from advanced grade stainless steel to ensure sharper points throughout surgical process. Needles are ribbed for easy grip and siliconized for smooth penetration.
- Needles to suture combination available for surgeons requirements.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P) , The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

SUTRYL

Synthetic Absorbable Surgical Sutures Coated & Braided Polyglycolic Acid (PGA)

SUTRYL is an ideal and time tested synthetic absorbable suture, widely used by surgeons all over the world. PGA's superior features over catgut are predictable absorption, outstanding tensile strength, in-vivo inertness and excellent handling properties.

Braided

For easy handling and secure knot tying.

Coated

SUTRYL is coated with non-toxic and bio-compatible material called Polycaprolactone & Calcium Stearate which facilitate smooth passage through tissues and firm knotting.

Synthetic

For minimal tissue reaction.

Absorbable

By hydrolysis. Complete between 56 & 70 days. Always predictable and reliable.

Tensile Strength

SUTRYL tensile strength surpass even the standards set by U.S. Pharmacopoeia and substantially higher than catgut.

Color

Violet and undyed.

Range

Gauge sizes 6/0 to 2 (U.S.P)

Supplied as needled sutures and ligatures.

Sterilisation

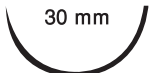

Ethylene Oxide

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P) , The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

SUTRYL quick

Polyglactin 910 Rapid, Synthetic Absorbable Surgical Sutures Coated & Braided

Composition :

Poly(glycolide - co - L - lactide) .

Coated

Coated with Poly (glycolide-co-L-lactide) calcium stearate, etc. to ensure excellent handling and knot security.

Absorbable

Short-term absorption completed by 42 days by hydrolysis.
Predictable and reliable absorbability.

Braided

For easy handling and secure knot tying

Tensile Strength

Strength retention for 10-12 days

Color

Undyed.

Range

Gauge sizes 5/0 to 1 (U.S.P.)
Supplied as needled sutures .

Sterilisation

Ethylene Oxide

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P) , The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

Needle Length	Needle Description	Suture Length	Suture Size in USP	
37 mm	1/2 Circle Tapercut	90 cm Undyed	2-0 (3)	0 (3.5)
			T3722U9	T3720U9

PDO II

Polydioxanone Monofilament Synthetic Absorbable Surgical Sutures

Absorbable :

Always predictable and reliable .

Complete between 180 & 210 day, by hydrolysis.

Monofilament

Smooth tissue passage

Synthetic

Nonantigenic, nonpyrogenic and

Elicits minimal tissue reaction.

Tensile Strength

Very high initial tensile strength and long term strength

Color

Violet and clear (Undyed).

Range

Gauge sizes 6/0 to 2 (U.S.P)

Supplied as needled sutures .

Sterilisation

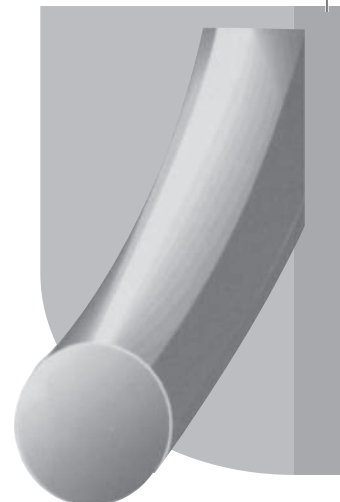

Ethylene Oxide

Caution

Care should be taken to avoid damaging the surface of the material with surgical instruments, as this could lead to fracture of the material.

As with other synthetic sutures, knot security requires the standard technique of square ties with additional throws as indicated by surgical circumstances and the experience of the operator.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P) , The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

PDO II

SUPRON

SUPRON

Poliglycaprone PGCL Poly(GLYCOLIDE co CAPROLACTONE), Monofilament [synthetic](#), absorbable Surgical [suture](#)

Absorbable:

Always predictable and reliable

Complete between 91–119 days

Monofilament:

Smooth Tissue Passage

Synthetic:

Non-antigenic, Non-pyrogenic and Elicits minimal tissue reaction

Tensile Strength:

Maintains high tensile strength, and has a half-life of 7 to 14 days. At 1 week, it's in vivo tensile strength is at 50–60% undyed (60–70% dyed), 20–30% undyed (30–40% dyed) at two weeks

Color:

Dyed (violet) and undyed (clear)

Range:

Gauge 6/0 to 2 (U.S.P)

Sterilization:

Ethylene Oxide

Caution:

Not to be used in areas of high tension (e.g., [fascia](#)).

Needle Length	Needle Description	Suture Length	Suture Size in USP

48 mm 	⊙ 1/2 Circle Taper Point	90 cm			R481-9

CHROGUT

Absorbable Surgical Sutures

Catgut Sutures - Chromic

CHROGUT, a natural absorbable suture is obtained by longitudinally slitting the intestinal submucosa of sheep and goat, twisting the ribbons and joining them in wet condition giving monofilament finish.

Monofilament

For smooth tissue passage.

Smooth tie down and knot security

Absorbable

By enzymatic digestion. Complete from 90 days.

Chromic

Treated to provide longer tensile strength retention than plain catgut.

Tensile Strength

Strength retention for at least 28 days.

Color

Tan.

Range

Gauge sizes 4/0 to 2 (U.S.P)

Supplied as needled sutures and ligatures.

Sterilisation

Ethylene Oxide

Caution

Avoid using where long term tissue approximation is needed. Absorption is faster in infected tissues.

Packaging

In a conditioning fluid containing isopropanol and water.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P) ,
The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

PLAINGUT

Absorbable Surgical Sutures Catgut Sutures-Plain

PLAINGUT, a natural absorbable suture is obtained by longitudinally slitting the intestinal submucosa of sheep and goat, twisting the ribbons and joining them in wet condition giving monofilament finish.

Monofilament

For smooth tissue passage. Smooth tie down and knot security

Tissue Reaction

Moderate. Plain catgut enjoys lower tissue reaction as compared to chromicised.

Absorbable

By enzymatic digestion. Complete by 90 days.

Tensile Strength

Strength retention for at least 21 days.

Color

Straw

Range

Gauge sizes 5/0 to 2 (U.S.P)

Supplied as needled sutures and ligatures.

Sterilisation

Ethylene Oxide.

Caution

Avoid using where long term tissue approximation is needed. Absorption is faster in infected tissues.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P), The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

SILKPRO

Nonabsorbable Surgical Sutures Black Braided Silk Suture

Braided

For easy handling and secure knot tying.

Coated

With silicon or wax to give "hand" to the suture. Does not become limp or brittle.

Natural

Produced from cocoons of the silk worm Bombyx Mori.

Non-Absorbable

Provides prolonged tensile strength retention in tissue.

Color

Black

Range

Braided 6/0 to 2 (U.S.P)

Supplied as needled sutures and ligatures.

Sterilisation

Ethylene Oxide.

Caution

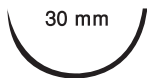

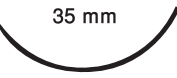

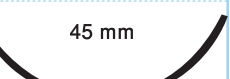

Avoid use with the presence of infection. Also cannot be used in biliary and urinary tract surgery.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P), The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

Nonabsorbable Surgical Sutures Monofilament Polypropylene Suture

Non-Absorbable

Provides prolonged tensile strength retention in tissue, even in the presence of infection.

Exceptionally smooth

For easy passage through tissue.

Monofilament

Smooth surface will not support bacterial growth.

Synthetic

Elicits only minimal tissue reaction.

Pliable

For easy knot tying.

Color

Blue.

Range

Gauge sizes 7/0 to 2 (U.S.P)
Supplied as needled sutures.

Sterilisation

Ethylene Oxide.

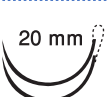

Caution

Care should be taken to avoid damaging the surface of the material with surgical instruments, as this could lead to fracture of the material.

As with other synthetic sutures, knot security requires the standard technique of square ties with additional throws as indicated by surgical circumstances and the experience of the operator.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P), The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

SULENE MESH

SUTCON Meshes are ultrasonically cleaned and doublepacked in internationally acceptable standard pouches, with EO sterile proof.

Further all edges of mesh are sealed to avoid post surgical inconvenience.

SUTCON Meshes are provided with very high bursting strength, elasticity and tested for biocompatibility after implantation.

Elastic - Ultrasonic clean - Edges sealed
Secure - Reliable - High Bursting Strength

PROPERTIES	SULENE MESH
Tensile Strength - Cross	290
(In Newtons) - Long	320
Breaking Elongation % - Cross	120
- Long	170
Bursting Strength (In Newtons)	245
Thickness	0.5mm
Fabric Weight (gms/m ²)	120
Fabric Count (dtex)	186
Monofilament Diameter	0.15mm
Pores size	0.80mm

Catalogue No.	Description	Size
PM 611	Monofilament Polypropylene (Undyed) Nonabsorbable Synthetic Knitted Surgical Mesh.	6 cm x 11 cm
PM 1515	Monofilament Polypropylene (Undyed) Nonabsorbable Synthetic Knitted Surgical Mesh.	15 cm x 15 cm
PM 3030	Monofilament Polypropylene (Undyed) Nonabsorbable Synthetic Knitted Surgical Mesh.	30 cm x 30 cm

BIOLON

Nonabsorbable Surgical Sutures Monofilament Polyamide

Material

Polyamide 6 and 66 Suture (Nylon)

Monofilament

Biolon is remarkably smooth, extruded to provide a strong uniform strand

Synthetic

For minimal tissue reaction.

Non-Absorbable

Biolon suture is inert like stainless steel. Maintains tensile strength indefinitely in tissues, provides prolonged tensile strength retention in tissue

Color

Blue and black.

Range

Gauge sizes 10/0 to 2 (U.S.P)

Supplied as needled sutures and ligatures.

Sterilisation

Ethylene Oxide.

Caution

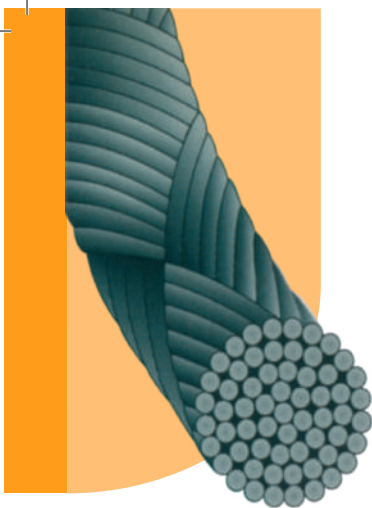

Not recommended for attachment of artificial prostheses in cardiovascular surgery.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P),
The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).

SUTCARE

Nonabsorbable Surgical Sutures Polybutyrate Coated Braided Polyester

Braided

For easy handling and secure knot tying

Non-Absorbable

Provides prolonged tensile strength retention in tissue

Soft and Pliable

For excellent knot security.

Coated

With Polybutyrate for smooth tie down and easy passage through tissue

Synthetic

Elicits only minimal tissue reaction.

Color

Green and white

Range

Gauge sizes 5/0 to 2 (U.S.P)

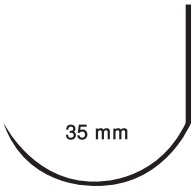

Supplied as needled sutures.

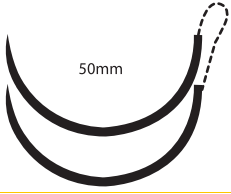

Sterilisation

Ethylene Oxide.

These sutures comply with the requirements of U.S. Pharmacopoeia (U.S.P),
The European Pharmacopoeia (PhEUR) and the British Pharmacopoeia (BP).
